process window at the NEW target $V_{min} \leq$ 0.575 V — blue passes, red fails. Solid black = read limit, long-dash = write limit, grey dash = today's spec 0.625 V.
Levers: local N σ ≤ 10 %, global N/P corner pull-in ≤ 20 %. Hollow grey star = PDK corner today, black star = after global pull-in.
